

# ADEQ Meeting Minutes

Arizona Department  
of Environmental Quality

## 56<sup>th</sup> Street and Earll Water Quality Assurance Revolving Fund (WQARF) Site Community Advisory Board Meeting

Thursday, November 2, 2006 at 5:30 PM  
Gateway Community College  
108 North 40<sup>th</sup> Street, Room 1106  
Phoenix, Arizona

### FINAL MINUTES

Ref: OU #07-081

CAB members present: Ginnie Ann Sumner, Alain Barnes, Marie Fenske, Tom Suriano and Russell Moore

CAB Members absent: Edouard Rivera, Kevin Gover and Alyce Herrick

ADEQ Staff in attendance: Cathy O'Connell, Project Manager; Wendy Flood, Community Involvement Coordinator; and Julie Riemenschneider, Remedial Projects Unit Manager

Members of the public present: Dale Johnson and Jen McCall

---

The following matters were discussed, considered, or decided at the meeting:

**1. Welcome and Introductions -**

Mrs. Wendy Flood welcomed all and thanked them for attending. Introductions were done for those listed in these minutes. Mrs. Marie Fenske, Co-Chair, facilitated the meeting.

**2. Acceptance and/or Changes to July 6, 2006 Meeting Minutes -**

Mrs. Ginnie Ann Sumner moved, and Mr. Tom Suriano seconded the motion to accept the minutes as written. The motion passed.

**3. Cleanup 101 and Site Technologies -**

Mrs. Cathy O'Connell handed out a booklet summarizing the presentation on techniques and approaches used for site cleanup. Mrs. O'Connell described different kinds of media (land, water and air) and the various technologies for cleanup of the different medias. Mrs. O'Connell provided various web sites where a lot of the information can be accessed for further research.

Mr. Johnson asked which technologies are used at the 56<sup>th</sup> Street and Earll Site. Mrs. Connell stated that the site is still in the investigation phase. Mr. Suriano explained that soil vapor extraction and excavation were used for removal of contaminated soils at the Motorola plant. It is possible that a pump and treat system might be used at the site.

Mr. Suriano talked about the well installation for the 52<sup>nd</sup> Street Motorola site in the 56<sup>th</sup> Street area. This site has had a lot done already since it was at one point thought to be part of the 52<sup>nd</sup> Street Site. The remainder of this topic will be discussed at the next meeting.

Mr. Johnson asked how this site relates to the 52<sup>nd</sup> Street Site. The history of the two sites was explained to the CAB.

**4. Voting and signing of CAB Charter-**

Mrs. Flood handed out the revised charter and summarized the proposed changes from the last meeting. Mr. Kevin Gover was not present, so the signing of the charter was postponed until the next meeting.

**5. Discussion on Community Involvement Plan Questionnaire -**

Mrs. Flood displayed the questionnaire that was mailed to all residents on the mailing list. Mrs. Flood explained the reason for the mailings and the community involvement plan. Those that responded will be called over the next few months to aid in drafting the plan.

**6. Call to the Public -**

Mr. Johnson thanked Mrs. O'Connell for her presentation. He asked about having a web site especially for this WQARF site for the public to access in addition to the information in the library. It was requested of Freescale to look into providing this feature. Mrs. O'Connell will check into the possibility of doing something similar on the ADEQ website.

Mr. Johnson felt the CAB also needed to be informative as well as advisory in its role. This two-way process is important to maintain. Mrs. O'Connell offered to come speak to neighborhood associations, and she also mentioned that there is an ADEQ Speakers Bureau that is available to give presentations. Mr. Johnson stated there is fear embedded into people, so that is why this is important. It was also suggested that the two sites be looked at as the same to be more effective for the public. Mr. Johnson encouraged ADEQ and the CAB to look at this aspect even though he knows the rules state otherwise. Mrs. O'Connell stated she would communicate with her counterpart on the 52nd Street Site to see what accommodations could be reached. Mrs. Sumner agreed that Freescale should come up with a web site for this site for the public to access. Mrs. Sumner disagreed that the two sites should be talked about simultaneously.

Mr. Suriano explained that there is not an exposure risk from the water contamination because the drinking water comes from a municipal source. The groundwater that is discussed is very deep below ground surface and there are no contaminated soils. Mr. Suriano commented that several risk and health assessments were conducted at the site and showed no concerns.

**7. Next Meeting Date and Agenda Discussion –**

Agenda topics for the next meeting will include a site update, web request update by Freescale, construction update, signing of charter, timeline of the project, CAB member status of the responsible party representative, and CAB application voting.

The next meeting date was set for January 11, 2007 at Gateway Community College at 5:30 p.m.

**8. Adjournment -**

Mrs. Sumner moved and it was seconded to adjourn the meeting.
